# Catalogue of High Grade and Hardy Trees, Shrubs and Plants for all Purposes APM

U.S. Departing

## THE NEW ENGLAND NURSERIES BEDFORD, MASSACHUSETTS

Phone Lexindton 274

#### ANNOUNCEMENT

It gives us pleasure at this time to announce that we were awarded both Gold and Silver medals for the quality of our Evergreens, Shrubs and Herbaceous Perennials on exhibit at the Pan-American Exposition recently held at San Francisco. This fact greatly strengthens our previous claim that "Bedford Grown Means Quality."

Our Stock of Trees and Plants, which are grown under severe climatic conditions, we confidently recommend as the hardiest and best obtainable. Winters start here about December 15, and generally end by March 15. The lowest record of recent years was reached in January, 1914, when the thermometer registered 32 degrees below zero. Our usual record is 22-25 below, and it is safe to say that "Bedford grown trees and plants will live and thrive everywhere.'

While we give our best efforts to produce and furnish high grade trees and plants, and do not attempt to pose as landscape architects, we are always happy to give such assistance as we can to customers in making the proper selection of what to plant, and advice as to the care of plants, and we respectfully invite correspondence pertaining to problems of interest to

planters.

## DIRECTIONS FOR PLANTING AND CARE OF TREES AND PLANTS WHEN FIRST RECEIVED FROM THE NURSERY.

Any good garden soil is suitable. Avoid excess of sand or gravel. Provide a liberal depth of loam mixed with manure, but the roots should not be allowed to come in contact

with the fertilizer used.

Planting. Dig holes large enough to accomodate roots without crowding, and set trees or plants a little deeper than they were standing in the nursery. (This is usually shown by soil marks on trunk or stem of plant.) Roses, Privets and Grapes particularly must be planted 4 to 5 inches deeper. Good loam should be worked in among the roots and carefully In the case of Rhododendrons, Evergreen Trees compacted. or other plants received with a compact ball of earth and roots

the roots should not be unnecessarily disturbed or balls broken.

Watering. After planting it is well to apply a sufficient amount of water to penetrate the soil to a depth of 1 to 2 feet, and it is well to remember that one heavy application of water is more beneficial than frequent light applications. Frequent cultivation of the surface soil reduces loss of moisture by

evaporation.

Roses should at once after planting be cut to inches of the ground. From deciduous trees and Pruning. within 4 to 5 inches of the ground. shrubs, one-third to one-half of the growth of the previous

summer should be removed.

Time for Planting. All hardy trees and plants of any description can be safely transplanted in the Spring as soon as frost leaves the ground, and usually as late as about June 1st. Also during the period beginning September 15th and continuing until the ground becomes frozen. Evergreen trees and shrubs can further be safely handled during August.

ANNOUNCEMENT WAR 26 1917

In response to many inquiries, we have published a pamphlet on "Practical Methods of Attracting Wild Birds," by Mrs. George H. Mellen, of Newton. Price in paper cover, 25 cents, board cover, 35 cents. Prof. C. J. Maynard, the well-known ornithologist, says of Mrs. Mellen's success: "I have been very much interested in your account of your birds. I think it very remarkable that you are able to attract so many birds in such a settled section of the city."

#### NOTICE TO CORRESPONDENTS

It is requested that explicit directions for marking and shipping packages accompany each order. When it is left to us to choose the mode of conveyance we will exercise our best judgment. We pack in such a manner that ornamental trees, shrubs, evergreens and hardy border plants can go safely by freight. In all cases the articles are at the risk of the purchaser after being shipped; if delay or loss occurs the forwarder alone must be held responsible. While we agree to supply thrifty trees, shrubs and plants, we do not warrant them after shipment, nor are we responsible for losses resulting from natural causes.

Our customers are requested to notify us instantly of any errors that may be committed in filling their orders, that we may at once make ample amends, as we desire to conduct our business in all respects satisfactorily to those who favor us

with their confidence.

### CONDITIONS OF SALE

Terms. Cash with order or a satisfactory reference from

strangers.

Those having an established rating need not send reference. Remittances should be made by Post Office Money Order, Drafts on Boston or New York Banks, or Express Money Orders. Postage stamps will be found a convenient method of remitting for small amounts and can be used by us to advantage.

A discount of 5 per cent is allowed when cash accompanies

order.

We give no warranty expressed or implied as to description, quality, productiveness or any other matter of any Nursery Stock, Bulbs or Plants we sell. No complaints will be considered that are not made within five days after receipt of stock.

THE NEW ENGLAND NURSERIES CO. Bedford, Mass.

Prices. The prices given in this catalogue, we believe, represent a fair value for such high grade stock as we always endeavor to supply.

When goods are to be shipped via Parcels Post, remittance

should be sent to cover cost for postage.

Location of our Nurseries. Located 15 miles from Boston, 12 miles from Lowell, 3 miles from Concord, and 5 miles from Lexington, our Nurseries can be reached via Boston & Maine trains from the North Station, Boston, or via electric cars from Arlington Heights. The cars connecting Arlington Heights and Concord pass directly through our property.

Visitors are always cordially welcome, but we ask the indulgence of parties calling during our busy Spring and Fall months, when it is quite impossible for us to devote as much time as we should wish in showing our Nurseries. The most courteous treatment possible, however, will always be given to these who favor us he reallies.

to those who favor us by calling.

THE NEW ENGLAND NURSERIES CO.

# Hedge Plants

Following is a list of plants, deciduous and evergreen, which lend themselves well to the forming of attractive hedges or screens, and a table giving the distance apart for the plants of a given size to be set, in order to form a dense growth. For full description of varieties, see General Index. Distance Price

# Gold Medal Evergreen Trees

We ship no evergreens which have not been transplanted several times. An Evergreen which has not been transplanted is often a finer specimen than transplanted stock but it is of little value to the buyer. The larger sizes are shipped with compact balls of roots and earth wrapped in burlap. This method insures the plants against loss.

Evergreen trees should be planted extensively, as they are equally attractive at all seasons. In winter they afford a shelter from the wind better than do deciduous trees, for which reason they are much appreciated by the birds, who also feed upon the seeds of many varieties.

# Reliable Hardy Roses

Cultural Directions

Cultural Directions

The best position for a Rose-bed is a southeast to southwest exposure. Roses in order to thrive best should have deep rich soil, and be kept from shade and roots of trees. Mix with the soil a liberal quantity of stable manure, preferable decomposed cow-manure.

Planting. Dormant plants may be set out during April and May, or in October and November. The plants should be inserted into the ground so deeply that the collar is at least four inches below the surface, and after carefully spreading the roots, the soil should be firmly compacted.

Watering and Mulching. At once after planting apply a thorough watering, and during a dry season, a mulch with strawy manure will prove beneficial.

Pruning. All roses, even the Climbing varieties.

Pruning. All roses, even the Climbing varieties, should be severely pruned back at once after being planted, and regardless of the size of the plants, each shoot should be cut back to within from three to five buds or eyes from the ground. Failures of Roses to succeed after transplanting are generally due to disregard of rules pertaining to deep planting and close pruning.

pruning.

HYBRID PERPETUAL ROSES

Strong Field-Grown Plants

Price: Each 35c. Dozen, \$3.50, except where otherwise noted.

The following named Hybrid Perpetual Roses can be relied upon for hardiness. If planted in good soil, set in the ground to the proper depth, and pruned back as directed, they will produce quantities of bloom the first season. Deep planting and close pruning is very essential.

Alfred Colomb. Carmine Red; very large and full.

American Beauty. Deep Pink, shaded with Carmine.

Anne de Diesbach. Clear bright rose; large and fragrant.

Baron de Bonstetten. Velvety Maroon; large and full.

Bright Pink; very large.

Coquette des Blanches. White, medium size, flowers in clusters, very free, Coquette des Alpes. Large, full and well formed with very large petals; lovely pure white in color; fragrant; profuse bloomer; hardy.

Francois Levet. Cherry Red, medium, free bloomer.

Frau Karl Druschki. White.

Begight Scarlet crimson. Beautiful in all stages,

Frau Karl Druschki. White.
General Jacqueminot. Bright Scarlet crimson. Beautiful in all stages, from bud until petals fall.
Harrison Yellow. Deep sulphur Yellow.
Hugh Dickson. Crimson, shaded Scarlet.
John Hopper. Bright Rose, Carmine center.
Jules Margottin. Carmine Rose.
Louis Van Houtte. Reddish-scarlet.
Mabel Morrison. One of the best White Roses.
Mme. Gabriel Luizet. Light, Silvery Pink.
Mme. Plantier. Pure White, early Summer bloomer.
Mme. Charles Wood. Vivid Crimson.
Magna Charta. Pink and Crimson. Very large, full and double.
Margaret Dickson. White, pale flesh color.
Marie Baumann. Brilliant Carmine-crimson; large, full; very fragrant.
Mrs. John Laing. Soft Pink; fragrant; blooms late in Autumn.
Mr. P. Wilder. Cherry Carmine. Excellent in hardiness and freedom of bloom.

M. F. Wilder. Cherry Samuel bloom.

Mrs. R. G. Sharman-Crawford. Color, deep Rosy-pink; flowers large and perfect; free bloomer.

Paul Neyron. Deep rose, very large.

Perle des Blanches. Pure White.

Persian Yellow. Bright Yellow.

Prince Camille de Rohan. Deep velvety crimson.

Ulrich Brunner. Cherry-red. A fine Rose.

HYBRID TEA ROSES

The following list contains only the hardiest varieties. If given a slight protection in Winter, they can be successfully grown anywhere in New Eng-

land.
Price: Each 40 cents. Dozen, \$4.00, except where otherwise noted.
Capt. Christy. Beautiful flesh color.
Caroline Testout. Large, double, clear Bright Rose.
Clothilde Soupert. Pearly White, but variable, the same plant aften producing Red and White bloom.
Gloire de Dijon. Buff, with Orange center.
Grus an Teplitz. Dark Red.
K.A. Victoria. Delicate Creamy-white, free flowering; quite hardy.
Killarney. Pink.
Killarney. White. Considered by many one of the best White garden to the same plant after the product of the best white garden to the same plant after the product of the best white garden to the product of Roses

La France. Silvery-rose, changing to Pink. Exceedingly sweet and hand-some. Blooms soon after planting. Maman Cochet. Clear Carmine-rose, Salmon shaded. Maman White Cochet. Sport from Maman Cochet. Pure White. Soliel d'Or. Gold and Orange to Reddish-gold. A color peculiar to itself. (Each 50 cents.)

### RELIABLE HARDY ROSES (continued)

MOSS ROSES
Strong Two Year Old Plants
Price: Each, 35 cents. Dozen, \$3.50
Blanche Moreau. Pure White, large, full.
Crested Moss. Deep Pink, buds surrounded with mossy fringe and crest.
Henry Martin. Fine Rosy-red.

### CLIMBING AND RAMBLER ROSES

Plant very deeply, and regardless of length of branches, prune back at once after planting to within 5 or 6 inches of the ground. Strong two year plants.

phants: A new climbing rose of great merit. Flowers single, rich Pink with White centers. Very free. Remarkably vigorous in growth. Foliage dark green and apparently insect-proof. Very hardy Each \$1.00 Dozen, \$10.00.

ALTHAEA ROSEA.—The Hollyhocks

Few hardy plants are more worthy of cultivation than the Hollyhocks. For interspersing among shrubbery, or planting in rows back of lower growing plants they are invaluable. Whether single or double, they appear in the most lovely shades of color. They thrive in any good soil. A slight protection in Winter is beneficial. The following strain is the most beautiful possible to secure.

Strong plants which will bloom this season: Each 15 cents. Dozen \$1.50; 100, 88.00.

Pure White. Double.

Salmon. Double.

Red. Double.

Red. Double.

Chelone Lyoni (Turtle Head) Red. 2 to 2½ feet. and handsome plant. Sun or half shade. August. A most usefu

### THE DAISIES

Chrysanthemum leucanthemum hybridum (Shasta Daisy). A variety remarkable for its prolific flowering qualities, as it can be relied upon to bloom constantly from June until frost. It thrives under severe conditions, and the flowers, which frequently measure 4 inches in diameter, are unexcelled for cutting. White. 1 to 2 feet. Sun. var. Alaska. White. 1 foot. June. Sun. var. Californica. Yellow. 1 foot. June. Sun. Maximum. White. 1 foot. July. Sun. var. King Edward. White. 1½ feet. July. Sun.

#### NEW GIANT HARDY CHRYSANTHEMUMS

The following two varieties are exceptional, both in height of plant and size of bloom. They were brought from England three years ago, and have since been grown in a garden near Boston without the slightest protection. If they were treated with disbudding as are tender Chrysanthemums, their blooms would undoubtedly fully equal such in size. We confidently recommend these varieties as the best hardy sorts yet introduced.

Chrysanthemum Pavona. Height 41 feet. Flowers pinkish lavender.

3 inches across. rient. Height 5 feet. Flowers pure white. Orient. 3½ inches across. Early.

### ASTER-FLOWERED HARDY CHRYSANTHEMUMS

ASTER-FLOWERED HARDY CHRYSANTHEMUMS

The hardy Chrysanthemum is very deservedly coming more and more into favor as a garden plant. Being very free-flowering, excellent for cutting, and one of the last to disappear in late Autumn, it should be more generally grown. While it is quite hardy, a slight Winter protection is advisable. The following named varieties have been selected from a large number of prize winners.

Chrysanthemum aurea floribunda. Yellow. 18 inches. October. Bridesmaid. Blush. 2 to 3 feet. October.

Charles Jenks. Pure White, fading to light pink. Very early, of medium height, and free-flowering. Size of flowers, 1½ inches. Davidiana. Pink. 2 to 3 feet. October.

Chrysanthemum Goldfinch. Golden. 2 to 3 feet. October.

Golden Pheasant. Golden. 2 to 3 feet. October.

Julia Lagravere. Dark Red. 2 feet. October.

Soliel d'Or. Orange. 2 to 3 feet. October.

Tiber. Red. 2 to 3 feet. October.

Victor. Crimson. 2 to 3 feet. October.

Victor. Crimson. 2 to 3 feet. October.

White Swan. White. 2 to 3 feet. October.

Yellow Queen. Yellow. 2 to 3 feet. October.

### BUTTON OR SMALL-FLOWERING POMPOM CHRYSANTHEMUMS

These varieties are very decorative. The charming little double flowers are last to succumb to Winter, frequently blooming after quite severe

Each 25 cents.

are 100.
frost.
Little Bob. Brownish Crimson. Each 25 cents.
Mignon. Sulphur Yellow. Each 25 cents. Clematis Davidiana. Blue. 2 to 3 feet. August and September. Flowers delicately scented. Good for border. Sun. recta. White. 3 feet. June and July. A great bloomer. Fragrant. Sun.

grant. Sun.

Convallaria majalis (Lily of the Valley) White. 9 inches. May and June Shade or half shade. Clumps, each, 35 cents.

Coreopsiis lanceolata grandiflora. Yellow. An easily grown plant, and probably the most continuous blooming perennial known. 2 feet. June to September. Sun. rosea (Pink Tickseed) Daisy-like flowers with yellow centers, and rose-colored rays, about 2-3 inches across. Height about 1 foot. A valuable border plant. June to September. verticillata, or tennuifolia (Whorled Tickseed). A most beautifu border plant. Flowers golden yellow and about one-half inch across. Foliage feathery and dark. Height 1 to 1½ feet. July and August.

1 Plant each of 20 choice sorts, and of sizes to bloom the first season.

# Fruit Trees and Small Fruits

The varieties of fruit trees we offer below are such as can be particularly recommended, and are best adapted to the climate of New England. Any variety desired and not listed, we can generally supply from our Geneva, N. Y. Nurseries.

Pruning.—Apples, Pears, Cherries, and Plums should at once after planting be pruned back to some extent, and it is generally well to remove from one-half to two-thirds of each branch. This treatment will insure a strong and healthy growth, and materially assist trees in taking hold. Leading Orchardists now recommend the spacing of fruit trees in orchards as follows:

Standard Apples	25 ft.	apart
Dwarf Apples	8 ft.	
Standard Pears	20 ft.	66
Sweet Cherries	20 ft.	66
Sour Cherries	15 ft.	66
Plums	15 ft.	6.6
Quinces	10 ft.	66
Peaches	15 ft.	66
	10 100

golden yellow, melting, pleasant, aromatic; very good; a valuable Winter Pear. Ripen- ing November to December.			
3 yrs. 5 to 7 ft. high	.40	4.00	30.00
DWARF PEARS			
The following varieties we can supply on Dwarf or	r Quinc	e stock.	
Bartlett. 3 to 4 ft. high	. 40	4.00	
Clapp's Pavorite, 3 to 4 tt, high	. 40	4.00	
Duchess. 3 to 4 ft. high	.40	4.00	
Lawrence, 3 to 4 ft, high	.40	4.00	
L. Bonne, 3 to 4 ft. high	.40	4.00	
Seckel. 3 to 4 ft. high	.40	4.00	

#### CHERRIES

l, 5 to 7 Feet High). Each, 50 cents. BIGARREAU OR SWEET CHERRIES (2 Years Old, Dozen, \$5.00

Moderate growth; large; black, tender, rich, juicy; best.

Black Eagle. Moderate growth; large; black, tender, rich, juicy; best. Ripening first of July.
Black Tartarian. Vigorous growth; very large; purplish black; one of the best. Ripe end of June.
Coes Transparent. Vigorous growth; medium; pale amber and red; one of the best. Ripening end of June.
Governor Wood. Vigorous growth; medium; clear, light red; tender, delicious. Ripe end of June.
Napoleon. Vigorous growth; very large; pale yellow with red cheek. Firm, juicy, and sweet; very good. Ripening first of July.
Rockport. Vigorous growth; large, pale amber and red; sweet and tender; good. Ripening first of July.

Nucy, and sweet; very good. Alpening first of only.

Rockport. Vigorous growth; large, pale amber and red; sweet and tender; good. Ripening first of July.

Windsor. Vigorous growth; large; liver colored; very firm; very good. A valuable variety; hardy. Ripening end of July.

Yellow Spanish. Vigorous growth; large; pale yellow with red cheek; firm, juicy and delicious; very good. Ripening end of June.

#### MORELLO OR SOUR CHERRIES

Early Richmond. Medium size; dark red; juicy, rich acid flavor. The stone adheres to the stem. One of the most valuable of Sour Cherries. Montmorency (Large Montmorency). A Cherry of the Richmond class, but larger and more solid. A more upright grower, equally hardy, and a heavy cropper. Ripens from seven to ten days later than the Richmond, entirely escaping danger from Spring frost.

Morello, English. Large, dark red, nearly black; tender, juicy, subacid; valuable for preserves; tree small, slender growth; productive.

#### PRUNING OF CHERRY TREES

While all Fruit Trees should at once after transplanting be cut back to some extent, severe cutting back is particularly necessary in the case of Cherry trees, and especially with varieties of Sweet Cherries. Cherry trees are, slow in becoming established, and all branches should be cut off to within four or five inches of the stem.

(2 Years Old, 5 to 7 feet High.) Each, 50 cents. Dozen, \$5.00.

#### PLUMS OF EUROPEAN TYPE

Bradshaw.

Bradshaw. A very large, oval, dark violet red; juicy, sweet and good; a valuable market variety.

Coes Golden Drop. Very large; light yellow; rather firm; rich, sweet and good; a dheres to the stone. Tree moderately vigorous and productive. A valuable late variety. Last of September.

Lombard. Medium; oval; violet red; juicy, pleasant and good; adheres to the stone; tree vigorous and very productive.

Reine Claude (Bavey's Green Gage). Round; greenish yellow; juicy melting, sugary, rich and excellent; separates from the stone; tree very vigorous and remarkably productive. A valuable market Plum. Ripens last of September.

ens last of September. Shropshire Damson. Originated in England. Dark purple; larger than

the common Damson; very productive. Shipper's Pride. Fruit large; color bluish purple, handsome and showy; flesh firm, of excellent quality; very productive, and a valuable market variety. JAPANESE PLUMS

(2 years Old, 5 to 7 feet High). Each, 50 cents. Dozen, \$5.00.

Abundance (Bhotan). Beautiful lemon-yellow ground, nearly overspread with bright cherry, and with a heavy bloom; large to very large, oblong, tapering to the point; flesh orange yellow, melting, rich and highly perfumed; abundant and annual bearer; tree a very vigorous, upright grower. Has been thoroughly tested, and is highly recommended. August.

#### NEW ENGLAND NURSERIES CO. BEDFORD, MASSACHUSETTS

#### FRUIT TREES AND SMALL FRUITS (continued)

3urbank. Large and beautiful, a clear cherry red, with a thin lilac bloom; flesh a deep yellow, very sweet, with a peculiar and very agreeable flavor. The tree is a vigorous grower, withlarge and broad leaves; usually begins to bear the second year after transplanting. Ripens later than the Abundance. End of August.
October Purple. Large, round fruit; dark, reddish purple yellow; flesh of most superb quality. Ripens middle of September. Its large, even size, beautiful color and superb quality make it very desirable for the garden or market.

market.

market.
Red June. An early ripening Japanese Plum; medium to large; roundish; conical; purple red; handsome; flesh yellow; quality good.
Wickson. Originated by Burbank. A sturdy, upright grower; fruit remarkably handsome, deep maroon red, covered with white bloom; stone small; flesh fine texture, firm, sugary and delicious; excellent keeper and shipper, will keep two weeks after ripening.

PEACHES

The Peach tree requires a well-drained, moderately rich soil. Warm, sandy loam is probably the best. When the trees are first planted all side branches should be cut back to within one-fourth to one-half inch of the main trunk, and the latter reduced one-third. Trees more than one year old are of but little value to the planter. The following listed varieties which are particularly recommedaded for the New England climate we offer in No. 1 trees, about 5 feet high.

Price: Each, 30 cents. Dozen \$2.50. Per 100 \$15.00.

Alexander. This excellent variety ripens very early; flesh firm, rich and good; most excellent shipper; freestone. Middle to last of July. Belle of Georgia. Very large, skin white with red cheek; flesh white, firm, and of excellent flavor; fruit uniformly large and showy; free. Very hardy and one of the latest to ripen.

Carman. A new, hardy, rot-proof Peach. Large, round; pale yellow skin and red blush on sunny side; white flesh, sweet flavor.

Champion. New. Handsome creamy white, with red cheek. It is of large size and of very superior flavor. Ripens about August 1, and has shown that it bears improvement over other white sorts.

Crawford's Early. Very large; yellow; juicy, melting; freestone. Ripening early September.

Crawford's Late. Very large; yellow; juicy, introduced for years, and is Crosby. This is considered the best variety introduced for years, and is

ing early September.
Crawford's Late. Very large; yellow; juicy; good; freestone. Ripening end of September.
Crosby. This is considered the best variety introduced for years, and is being extensively planted through New England, where hardiness is essential. It originated in Massachusetts.

Elberta. An exceedingly large, light-colored yellow Peach, a cross between Crawford's and Chinese Cling; juicy, well flavored; said to be probably the finest yellow freestone in existence; planted in enormous quantities in the Peach growing regions of the South. Ripens early in August.

Fitzgerald. A chance seedling, found in Ontario, outside of the Peach belt, where it has produced regular crops. The fruit is of very large size, pit very small. This promising new Peach is of the Crawford type, but excels that famous variety in size, hardiness and productiveness. Season same as Early Crawford.

Foster. Large, resembling Crawford's Early, but of better quality. Ripening early September.

Greensboro. The largest and most beautiful colored of all the early Peaches. Of good quality; juicy; freestone, but adheres slightly; ripens perfectly to the seed, and with the Alexander.

Mountain Rose. Large; white and red; juicy; good. Ripening end of Aug. Oldmixon Free. Large; greenish white and red; juicy and rich. Ripening middle of September.

middle of September.
Stump the World. Me
middle of September.
Triumph. New. A str

Medium to large; red and white; good.

Triumph. New. A strong grower and a sure and abundant bearer. Fruit a freestone and of large size, and bright yellow color. Ripens early, and young trees have borne over a half bushel of fruit each.

Wheatland. Large; golden yellow, with crimson; juicy, sweet and of fine quality. Ripening middle of September.

First class, 4 to 5 feet. Each 50 cents. Dozen \$5.00

Bourgeat. A new variety of the best quality, tender and good. Ripening shortly after Orange, and keeping till past mid-winter. Champion. The fruit is very large, young trees, two years from the bud, are often loaded with fruit. Its season is about two weeks later than the Orange.

Orange.

Range. Large, roundish, bright golden yellow; cooks quite tender, and is of very excellent flavor. October. Orange.

### APRICOTS 3 to 4 feet high. Each 50 cents.

NECTARINES
3 to 4 feet high. Each, 50 cents.
FAN-TRAINED FRUIT TREES
We offer a limited number and varieties of handsome fan-trained Apple
Pear, Plum, Cherry and Peach trees. List of varieties upon request.
Price each \$3.50.

## Small Fruits

#### BLACKBERRIES

Strong plants: Dozen, \$1.00. 100, \$5.00.

Agawam. Fruit medium size, jet black, sweet, tender and melting to the core; a very valuable variety for home use, being sweet throughout as son as black; very hardy, healthy and productive.

Eldorado. New. This splendid variety is, perhaps the best ever introduced. It stands when other varieties are winter killed, and has never failed to produce enormous crops of its very large, jet-black fruit, which are sweet and melting, and keep well after picking.

Erie. Fruit very large, excellent quality. There is no berry that rivals it in combining hardiness, large size, earliness and productiveness.

Snyder. A marvel for productiveness; fruit medium size, sweet and melting to the core; extremely hardy, standing the Winters where the Kittatinny and Early Harvest kill down.

Wachusett Thornless. Fruit of medium size, oblong, oval, moderately firm and less acid than any Blackberry we have seen; the plant is said to do equally well on light and heavy soils; it is hardy and almost free from thorns.

thorns.

#### RASPBERRIES

Price, except where noted, Dozen, \$1.00. 100 \$5.00.

Black Diamond. Most prolific; berries black, of high quality and good size, productive and hardy.

Columbian. A new variety of great promise. It is a very vigorous grower and very hardy. Fruit purple and delicious for table or canning, and an appelled the big view register. excellent shipping variety.

Cuthbert. (Queen of the Market). Large, dark crimson berries of firm texture, sprightly acid and of excellent quality; a certain cropper, always

be recommended.

Large, brightly crimson fruit of splendid quality, early and Marlboro. very hardy.

very narry.

Golden Queen. Large, yellow fruit, of highest quality and best size, and productive; fine for either home use or shipping purposes. \$1.50. 100, \$7.50.

St. Regis Everbearing. (New). Red; berries of large size and of a Red; Everbearing. (New). Red; berries of large size and of a bright crimson color; flavor very sweet and rich; excellent quality. Highly productive and very hardy. Producing abundantly throughout the entire Summer. Dozen, \$1.50. 100, \$10.00.

#### CURRANTS

Two year plants, except Perfection: Dozen, \$1.00, 100 \$8.00. Black Naples. Very large; black; bunches of medium length. Much valued for jellies, strong grower and coarse leaves. Cherry. Fruit of the largest size; deep red, rather acid; short bunches; growth strong, stout, erect; short jointed shoots. Fay's Prolific. Fruit very large, bright red and of excellent flavor; less acid than the Cherry. It has a long stem which admits of rapid picking and is enormously productive.

Lee's Prolinc. Black. The largest in very and value, as productiveness.

Perfection. The color is a beautiful, bright red, size as large or larger than Fay's; the clusters averaging longer. The quality is rich, mild, subacid, plenty of pulp, with few seeds. After three years trial this fruit was the first to receive the \$50.00 Gold Medal of the Western New York Horticultural Society. Dozen, \$2.50, 100 \$15.00.

White Grape. Very large, yellowish white; sweet, or a very mild acid. Excellent quality and valuable for the table. The finest of the white sorts.

#### GOOSEBERRIES

Downing. Whitish green, vigorous and prolific; juicy and good. A fine, reliable berry for general culture.

Each 20 cents. Dozen, \$1.50.

Houghton. Vigorous and slender grower. Its medium pale red berries are plentiful and good, and it can be depended upon.

Each 20 cents. Dozen, \$1.50.

Dozen, \$1.50.

Its medium pale red berries are

#### ENGLAND NURSERIES NEW BEDFORD, MASSACHUSETTS

FRUIT TREES AND SMALL FRUITS (continued)

Industry. An English variety more generally planted than any other, as it is free from mildew and bears freely very large dark red fruit of delicious quality. We recommend this for general use.

Each 20 cents. Dozen \$3.00.

Pearl. The most prolific Gooseberry known. One bush produced 2400 berries. It is free from mildew, and is much larger than the Downing. The color is bright green and quality first class. Being thoroughly tested, we offer it as the best of its class yet grown.

Each 20 cents. Dozen, \$2.00.

STRAWBERRY PLANTS

The following varieties can be recommended as the best obtainable for family use. All are perfect flowering.
Bubach. Very early. Large and Crimson.
Marshall. Mid-season. Large and Crimson.
Brandywine. Very late. Medium size.
Pan-American. Everbearing. (If the first crop of flowers is picked, the Pan-American will produce fruit from August and until late in September: Price: Runner plants of Strawberries for Spring planting.
Three first named sorts: Dozen, 25 cents. per 100, \$1.00.
Price: Pot-grown plants for August and September planting.
Three first named sorts: per 100 \$3.00.
Pran-American: Per 100, \$20.00.

Pan-American: Per 100. \$20.00.

ASPARAGUS

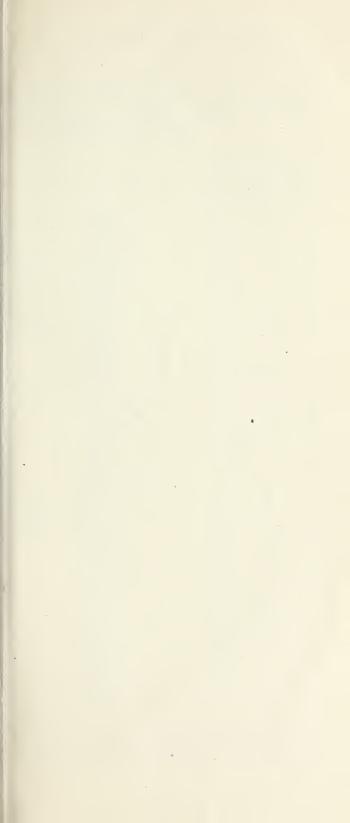

Our new Rust-proof Giant Asparagus has been thoroughly tested, and appears to be perfectly immune from rust. It produces a large yield, and in quality is second to none. We predict that when it becomes better known, will supplant all other varieties.

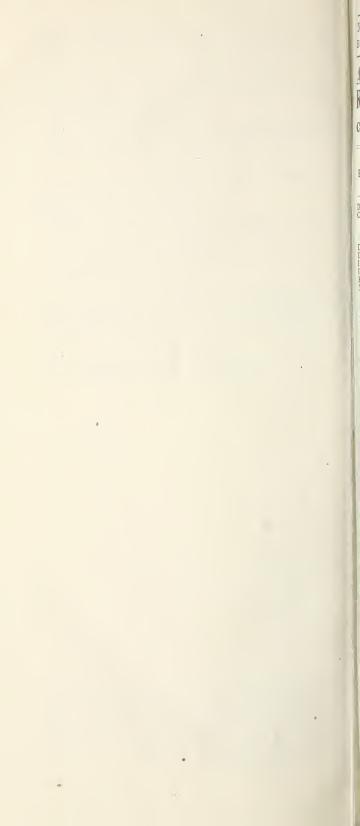

Strong I year old plants. Dozen, 35 cents, per 100 \$1.25, per 1000 \$10.00.

RHUBARB

Champagne. A choice new English variety.
2 yrs. old. Each 50 cents. Dozen \$5.00.
Linnaeus (Myatt's). Large, early and of good quality.
2 yrs. old. Each 25 cents. Dozen \$2.50.

Note.—At the prices given in this catalogue, we will guarantee to furnish strictly first class stock of the sizes and ages named, but as our prices are low, and as it is impossible for us to guarantee the life of a plant after it leaves our hands, we cannot replace free any stock which may fail to grow. If a guarantee for one year is desired, add 20 per cent to the catalogue price.
